PERSONAL PROJECTS

Great Minds (12/2020 - Present) ↗
- This is an education project for children and teenagers located in USA. The application is meant to help student and teachers with their daily basis job such as assignments and assessments and live classes. This project has gave me large experience using ReactJs, NextJs, Web accessibility, Unit testing and some other programming and teamwork skills.

API Delilah Resto (04/2020 - 07/2020) ↗
- I managed to improve my skills on the backend side and develop an API with NodeJs and Express for a restaurant that will allow the user to order and the administrator to create more dishes for the menu and manage the orders.

GifOS (01/2020 - 03/2020) ↗
- I used advanced HTML and CSS skills with preprocessors for website layout. And I used JavaScript for on-site interactions and to consume the Giphy API to display search-related gifs or create custom gifs.

Podcast (11/2019 - 01/2020) ↗
- This project allowed me to put into practice the basic skills with HTML and CSS for the development of a website.
